

**NNA Treasurer's Report
Fall, 2009**

NNA continues to remain stable financially. Office expenses are minimal as we have contracted the office responsibilities and continue to use the service of our accountant. This has saved all salaries, office space and supplies. The Board meets monthly by conference call. We are able to do the work on NNA on a more frequent and cost effective manner. We meet one time each year to plan for the upcoming year

Legislative issues were the most costly of our expenses so far this year \$13,287 has been expended during the legislative session to include our lobbyist and frequent legislative committee meetings. Technology continues to assist in the ability to meet frequently and not incur travel expenses. This session was very successful for nursing. These frequent meetings made possible by a small group of nurses from each area of the state. These nurses dedicated time and expertise to continue to support nurses and the patient we care for.

The board continues to strive to keep NNA a valuable source to the nursing community in Nevada. ANA which NNA is a constituent member also continues to work at a federal level to support every nurse in this country. I have been a member of this board for many years and I am always amazed at the passion that the board displays for the nursing profession.

Thank you for allowing me to be a part of this special organization.
